

Rubric: Technical track

Criteria	High Distinction 100 – 85%	Distinction 84 – 75%	Credit 74 – 65%	Pass 64 – 50%	Fail 49 – 0%	Points (100)
Hyper-parameter Selection	The hyper-parameter selection process is comprehensive and demonstrates excellent knowledge of the selected algorithm. The chosen hyper-parameters are justified, and their impact on the model's performance is explained in detail.	The hyper-parameter selection process is sound and demonstrates a good understanding of the selected algorithm. The chosen hyper-parameters are well-justified, and their impact on the model's performance is explained.	The hyper-parameter selection process is adequate but could be more comprehensive. The chosen hyper-parameters are justified, and their impact on the model's performance is briefly explained.	The hyper-parameter selection process is limited and demonstrates some gaps in understanding of the selected algorithm. The chosen hyper-parameters are briefly justified.	The hyper-parameter selection process is insufficient and demonstrates poor knowledge of the selected algorithm. The chosen hyper-parameters are not well-justified.	20
Variable Identification	The most important variables in the model/solution are identified using appropriate techniques. The selected variables are well-justified, and their impact on the model's performance is explained in detail.	The most important variables in the model/solution are identified using sound techniques. The selected variables are well-justified, and their impact on the model's performance is explained.	The most important variables in the model/solution are identified using adequate techniques. The selected variables are briefly justified, and their impact on the model's performance is mentioned.	The most important variables in the model/solution are identified but the selection is not well-justified. The impact of the selected variables on the model's performance is not well-explained.	The most important variables in the model/solution are not identified, or the selection process is flawed.	20
Model Evaluation and Selection	The model/solution performance is evaluated using appropriate metrics. The evaluation is comprehensive, and the chosen model is well-justified based on the results.	The model/solution performance is evaluated using sound metrics. The evaluation is adequate, and the chosen model is well-justified based on the results.	The model/solution performance is evaluated using basic metrics. The evaluation is limited, and the chosen model is adequately justified based on the results.	The model/solution performance is evaluated using basic metrics. The evaluation is limited, but the chosen model is not adequately justified based on the results.	The model/solution performance is not evaluated or evaluated using wrong metrics. The chosen model is not adequately justified based on the results.	30
Model Comparison	Alternative models are compared, and the reasons for the selection of the chosen model are explained in detail.	Alternative models are briefly compared, and the reasons for the selection of the chosen model are explained.	Alternative models are just mentioned, and the reasons for the selection of the chosen model are briefly explained.	Alternative models are just mentioned, and the reasons for the selection of the chosen model are missing.	Alternative models are not mentioned, and the reasons for the selection of the chosen model are missing.	10
Follow-up Questions	The follow-up questions are answered all correctly and explained clearly and comprehensively that demonstrating outstanding knowledge of the subject matter.	The follow-up questions are answered mostly correctly and explained clearly and comprehensively that demonstrating strong knowledge of the subject matter.	The follow-up questions are answered partially correctly and explained clearly with good details that demonstrating good knowledge of the subject matter.	The follow-up questions are answered partially correctly with acceptable clarity and detail that demonstrating acceptable knowledge of the subject matter.	The follow-up questions are not answered or answered incorrectly with no explanation.	20
